**Subject:** New provincial "speculators" tax

Hi there; I would appreciate this email being forwarded to Mayor and Council.

Dear Mayor and council:

I am writing you to implore the Village to officially write to the provincial government requesting to opt out of the "speculators" tax proposed for certain regions of the province, on the assumption that Harrison Hot Springs does fall within one of the proposed zones.

My wife and I, along with our daughter, have had a condo in the Heron's Cove complex since 2007. We try to spend as much time as we can there- summers, Christmas and Spring breaks, and many weekends- when not in Surrey where we currently live. In retirement, we envision ourselves moving there full time.

Although we do not reside there, we do enjoy places like Kitami and Muddy Waters (and perhaps the pub a little too often), among other services.

So needless to say, we are gobsmacked by the notion of the "speculators" tax being applicable to us.

I've noticed that the municipality of West Kelowna and the Regional District of Nanaimo have officially indicated to the provincial government they would like to opt out of the tax, if given the choice. Recognizing there are many others that have places in your Village as secondary residences like ourselves, I strongly encourage you to do the same.

Thanks for the consideration.

Chuck Keeling

## VILLAGE OF HARRISON HOT SPRINGS

### REPORT TO COUNCIL

**TO:** Mayor and Council                      **DATE:** March 13, 2018  
**FROM:** Troy Davis  
                 Infrastructure Manager                      **FILE:** 5600-05-03  
**SUBJECT:** Expansion of water treatment plant capacity

---

**ISSUE:** Addition of a train of ultrafiltration membranes to the water treatment plant to increase capacity.

#### **BACKGROUND:**

When the water treatment plant was built in 2014 it was designed to be expanded as demand increased. Modelling undertaken by CTQ Engineering indicates that the plant will be operating at capacity once the Aspen Lane and Schooner Place Developments, including the proposed strata developments north and south of the single family homes currently under construction, are built out. To meet this rising demand and to accommodate future development proposed for the community, it is recommended that the second train of membranes be installed. The cost for these membranes will be approximately \$250,000.

With the addition of the second train of membranes the two booster pumps will be running continuously whenever the reservoir calls for water. It has been suggested by Aslan Technologies that a third booster pump be installed. Doing so would provide a spare pump should one fail, and will also extend the life expectancy of the pumps, as the pumps would alternate duty with two out of three pumps working at a time. Fortunately, the infrastructure for the third pump was installed when the plant was built in 2014, so the cost to install a third pump would not require additional pipe fitting. This pump will cost approximately \$35,000 and could be installed in conjunction with the new train of membranes.

**FINANCE:**

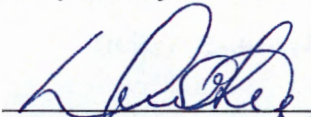

Because these improvements are directly related to growth, both the membrane train and the new pump will be funded by development cost charges (DCCs). The 2018 Financial Plan identified \$250,000 to fund new membranes from DCCs. The additional pump would be in addition to this. These costs are exclusive of engineering.

**RECOMMENDATIONS:**

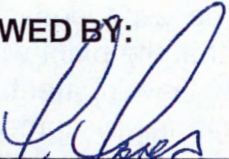

THAT Council approve the purchase and installation of a second train of ultrafiltration membranes from Aslan Technologies for up to \$250,000, to be funded from development cost charges;

AND THAT the Village fund an additional booster pump for the water treatment plant, at a cost of up to \$35,000, to be funded from development cost charges.

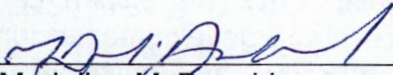

Respectfully submitted;

## REPORT TO COUNCIL

TO: Mayor and Council

DATE: March 13, 2018

FROM: Troy Davis  
Infrastructure Manager

FILE: 5225-08

SUBJECT: Storm Water Upgrades on Diamond Street and Pine Avenue

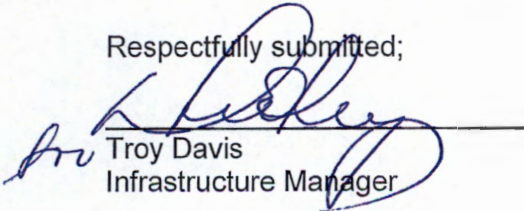

**INFORMATION UPDATE:** Storm water upgrades for Pine Avenue and Diamond Street

**BACKGROUND:**

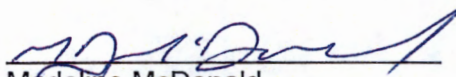

As Diamond Street is currently under construction it is opportune to replace the current storm drainage infrastructure at this time, and to provide storm drainage to the residents on the west side of Diamond Street. CTQ Engineering have developed a storm drainage plan (see Figure 1) that will extend storm water infrastructure to the end of Diamond Street at a cost of approximately \$65,000, to be funded from gas tax. Addressing this issue at this time is prudent both financially and logistically, as the area was identified for upgrade in the *Liquid Waste Management Plan* (LWMP), and paving and curbing has yet to occur. As recommended in the LWMP the work will upgrade 85m of existing storm main from 200mm to 250mm, plus provide drainage to the properties on the west side of Diamond Street.

During the installation of the new water system on Pine Avenue it was discovered that much of the storm drainage system has failed. The system is quite old and was also recommended for upgrading in the *Liquid Waste Management Plan* (LWMP). The LWMP recommendation was to replace 287m of 300mm vitrified clay pipe with 375mm PVC pipe. The projected cost in the LWMP for this work was approximately \$289,000. As Pine Avenue is currently under construction and there would not be any additional paving expenses, the cost for this work will be approximately \$100,000 and will be funded by gas tax.

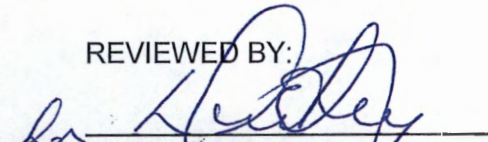

Respectfully submitted;
